Dear friends of the Germanic New Medicine!

The New Year begins with a great pleasure: Last year we established a private University. And this is but the first step.

After 29 years of the attempted suppression of the knowledge of the Germanic New Medicine, we need no longer rely on corrupt universities teaching what we consider "former medicine".

Within the next few days we will know how to proceed. However I do wish to say that because our system does not involve any hypothesis that we will do a better job than all other faculties teaching former medicine.

Now we can do our own verifications, and everyone will be able to observe this on the Internet. We will also conduct live examinations for everyone to watch, but only in regard to the GNM principles.

In order to ensure the value of these examinations, I intend to be the presiding examinations chairperson and I guess in future this kind of experience will be simply priceless for the examinee!

It will also be possible to download, free of charge, these weekly sessions that will be conducted live on the Internet.

Besides all of this, there stands an empty hospital in Sandefjord that I wish to possess to be used as a teaching hospital. Initially only four rooms would be enough...

My dear friends, I hope that we can now make great strides forward. I realize that our poor patients have little time. Daily, as a result of the brutal medicine practiced today, 1500 people are executed in Germany... worldwide 2.5 million... and almost none belonging to a particular religious organization...

No one has any sympathy for our poor patients.

In Sandefjord we will do our best, especially hoping the forthcoming verdict from the Norwegian Supreme Court (Hoyesterett).

My wish for all is that we make great strides in 2010.

With my best regards from Norway,

Yours,

Ryke Geerd
